

AMENDMENTS TO THE CLAIMS:

The listing of claims will replace all prior versions, and listings, of claims in the application:

LISTING OF CLAIMS:

1. (Original) An article of apparel, such as a shoe, carrying a chamber and illumination means for illuminating the chamber with light, the chamber having light-affecting means adapted to affect light from the illumination means, and the chamber having a window for enabling the effect of the light affecting means on light from the illumination means to be viewed.
2. (Currently Amended) An article according to claim 1, wherein the light affecting means is movable, rotatable or oscillatable within the chamber.
3. (Currently Amended) An article according to claim 1 which further comprises a motive means for moving the light affecting means in response to movement of at least a part of a wearer of the article ~~wherein the light affecting means are mounted to a part of the article so as to be movable with respect to the article.~~
4. (Currently Amended) An article according to claim 1 further comprising illumination control means for controlling the illumination means ~~wherein the light affecting means comprises an object mounted within the chamber so as to be rotatable or oscillatable.~~

5. (Currently Amended) An article according to claim 1 further comprising illumination control means for controlling the illumination means wherein the illumination control means is operable to control the illumination means so that the illumination means and light affecting means produce a projected image wherein the light affecting means comprises a light affecting object and vibration means for causing the object to vibrate.
6. (Currently Amended) An article of apparel such as a shoe, carrying a chamber and illumination means for illuminating the chamber with light, the chamber having light-affecting means adapted to affect the light from the illumination means, and the chamber having a window for enabling the effect of the light affecting means on light from the illumination means to be viewed and further comprising control means for controlling the motive means so that the illumination means and light affecting means produce a projected image according to claim 1, wherein the light affecting means comprises a light affecting mass and a resilient member for coupling the mass to the article.
7. (Currently Amended) An article according to claim 6, wherein the control means is operable to receive information defining an image mass comprises a mirror and the resilient member comprises a spring.
8. (Currently Amended) An article according to claim [6,] 1, which further comprises a motive means for moving the light affecting means in response to movement of at least a part of a wearer of the article, further comprising activating means for activating

said illumination means wherein the mass comprises a reflector and the resilient member comprises a filament.

9. (Currently Amended) An article according to claim 1, wherein said illumination means comprises at least one LED ~~the light affecting means comprises a disc rotatably mounted to the article by an axle and a mass mounted eccentrically on the disc.~~

10. (Currently Amended) An article according to ~~any one of claims 1 to 9[,]~~ claim 1, which comprises a motive means for moving the light affecting means in response to movement of at least a part of a wearer of the article, wherein said light affecting means comprise one or more portions of light affecting material on a wall of said chamber and wherein said one or more portions of light affecting material form an image comprising a ~~motive means for moving the light affecting means in response to movement of at least a part of a wearer of the article.~~

11. (Currently Amended) A chamber for attachment to an article of apparel, such as a shoe wherein said chamber is illuminable with light, the chamber containing light affecting means adapted to affect light from an illumination means, and the chamber having a window for enabling the effect of the light affecting means on the light from the illumination means to be viewed ~~An article according to claim 10, wherein the motive means comprises a hydraulic or pneumatic system.~~

12-55. CANCELED.
